

# handyweb //

Digital solutions development studio

# handyweb //

Designs, develops, and implements digital solutions for startups and growing businesses. Operating since 2019, with over 50 launched projects including SaaS products (web and mobile apps), solutions for major retailers (retail brands), franchising platforms, MedTech, and system integrators.

## Trusted by:

HOHORO

.investax

## Our partners:

ARDA

## End-to-end product development

Our dedicated, in-house product team oversees every stage — from planning to final release and ongoing technical support.

## Flexible and transparent processes

We divide projects into iterations. We send weekly and monthly reports. We add business representatives to JIRA.

## Support and project evolution

We guarantee SLA 99.9% by contract. We have experience managing projects with a high volume of revisions.

## Verified experience and reviews

Our clients recommend us and are ready to honestly share their experience working with our team. We are happy to provide their contacts so you can learn about our work directly.

Embeddings, File tuning, Langchain, Vector stores, OpenAI API

# Workflow process

handyweb //

1. A manager will contact you and arrange a meeting. Ready to sign a Non-Disclosure Agreement (NDA) if necessary.
2. At the meeting, we'll get acquainted and discuss the task. We'll also talk about the preliminary budget and timeline.
3. Our project manager will contact you to gather detailed functional and business requirements.
4. We'll provide a comprehensive project estimate including cost, timeline, team composition, and development roadmap.
5. After that, all that's left is to sign the contract — and we'll begin executing your project!

Vladimir, CEO
